

War Pony

War Pony is an overdrive and distortion, delivering tone that's aggressive, wild, and designed for battling a range of tonal situations. Originating from our War Party, War Pony completely removes all boundaries when it comes to NativeAudio design. From the fresh layout to the updated and destructive tonal characteristics, War Pony is here to wage war on bad tone.

Power: 9-18VDC, 22mA (center negative)

About the Artwork: The term "War Pony" is in reference to the warrior's beloved war horse. In Native American culture, the horse was an extension of the warrior. The warrior would proudly ride their War Pony into battle, earning them approval and prominence within the tribe. The War Pony would often be painted with the same pattern and colors that the warrior used in battle, and it was through these markings the story of the warrior was told.
